

The medications shown below are not covered on the Medica drug list. In most cases without an approved exception, if you fill a prescription for one of these drugs, you will pay the full retail price.

**Take action to avoid paying full price.** If you're currently using one of the excluded medications, please ask your doctor to consider writing you a new prescription for one of the following preferred alternatives. Additional covered alternatives may be available. Costs for covered alternatives may vary. Log on to [Medica.com/SignIn](https://www.Medica.com/SignIn) to compare drug prices. Not all the drugs listed are covered by all prescription plans; check your benefit materials for the specific drugs covered and the copayments for your plan. For specific questions about your coverage, please call the number on your member ID card.

This list is subject to change. There may be additional plan restrictions. Please consult your plan for further information.

<sup>^</sup> Multisource brand exclusion – The generic equivalent of this brand-name medication is covered under your plan. FDA-approved generic medications meet strict standards and contain the same active ingredients as their corresponding brand-name medications, although they may have a different appearance. As new generic medications become available, additional multisource brand products may become excluded.
