Description

Telehealth is the delivery of health care services or consultations while the patient is at an originating site and licensed health care provider is at a distant site.

Originating site is the site at which the member is located while receiving health care services via telehealth.

Distant site means a site at which a licensed health care provider is located while providing health care services or consultations by means of telehealth. A communication between a licensed health care provider and a patient that consists solely of an email or facsimile transmission does not constitute telehealth consultations or services.
